

UNIVERSITY CLUB

Cooperative automation -
when man and machine save lives

Impulse presentations followed by
open discussion with snacks and drinks

May 16, 2023
6:30 pm

KIT Campus Süd
01.52
Gastdozentenhaus

From 5:00 pm onwards
demonstration of vehicle
with lifting rescue cage

Welcome to the UNIVERSITY CLUB!

Automation and digitalization are advancing rapidly and offer completely new solutions for many applications.

Especially when it comes to rescuing people from dangerous situations, there are a multitude of possibilities. This raises some important questions:

- Is it symbiotic or do humans and machines get in each other's way?**
- How much should a machine take over?**
- How far can we trust machines when human lives are at stake?**

These exciting topics await you with the opportunity to discuss with experts at the University Club!

Come and join us!
